**01 - WTC180SPH/IR - IR LED ENHANCED LOW LIGHT CAMERA**  
£71.05

This IR enhanced model has become an industry standard and offers a 4mm or 6mm fixed lens with 30 IR LED's for excellent daytime colour and enhanced night viewing in mono covering a maximum internal area of 20m or 12m externally subject to reflective objects. Sony Super HAD CCD and Processing technology is used to retain good image clarity at a budget price. [\[Product Details...\]](#)

**02 - WTC400SHR/IR - HIGH RESOLUTION IR LED DAY / NIGHT CAMERA**  
£94.25

This High Resolution IR enhanced model is the big brother of the WTC180SPH/IR which has become an industry standard. This new model offers 550TVL colour daytime viewing with 570TVL at night. IR coverage has been extended by the addition of another 18 LEDs to a total of 40 pieces giving a range of at least 30m subject to reflective objects. Either a 4mm or 6mm fixed lens for excellent daytime colour and enhanced night viewing is available. A High Resolution Sony Super HAD CCD and Processing Technology is used to retain excellent image clarity. [\[Product Details...\]](#)

**03 - B250HQ - BULLET STYLE SUPER HI-RES IR VARIFOCAL**  
£129.04

The B250HQ camera is ideal for users that need a small bullet style camera offering performance similar to larger commercial style models. This camera has Power IR LED's and True Day / Night switching for a top quality image. A 3.8~9.5mm Varifocal lens is standard. [\[Product Details...\]](#)

**04 - NT-IRM50/25 - LONG RANGE IR LED ENHANCED LOW LIGHT CAMERA  
£181.24**

The Pro NT-IRM50/25 is a unique viewing tool for sites that require close up observation during the day or night. The High Power "Piranha" IR LED's will reach to over 40m subject to reflective objects. Combined with a specially designed 25m telephoto Day / Night IR corrected lens the clarity is superb at all times. [\[Product Details...\]](#)

**05 - CMD2530/DNIR - COMMERCIAL STYLE SUPER HI-RES IR VARIFOCAL  
£181.24**

The CMD2530/IRDN camera uses a new Commercial design Cable Managed Housing with Power IR LED's and True Day / Night switching for a top quality image. A 3.8~9.5mm or 9~22mm Varifocal lens is available with easy external adjustment of focal length and focus. [\[Product Details...\]](#)

**06 - WTC450 IRSX/V - SUPER HI-RES EXVIEW VARIFOCAL TRUE D / N  
£195.74**

The WTC450IRSX/V camera uses a High Tech Cable Managed casing design that allows External Adjustment of the Aspherical High Quality Day / Night Varifocal lens and the Iris Gain whilst retaining its IP66 rating. The picture clarity is superb due to the new Super High Resolution Sony Super Exview CCD and full Sony Processing Technology. True Day / Night switching is governed by a photocell and employs the latest filter change mechanism for True daytime colour and enhanced night mono under IR illumination. This model is for use at sites where the optimum viewing distance is up to 15m externally or 20m internally. [\[Product Details...\]](#)

**07 - WTC550 IRSX/V - SUPER HI-RES EXVIEW VARIFOCAL TRUE D / N  
£202.99**

The WTC550IRSX/V camera uses a High Tech Cable Managed casing design that allows External Adjustment of the Aspherical High Quality Day / Night Varifocal lens and the Iris Gain whilst retaining its IP66 rating. The picture clarity is superb due to the new Super High Resolution Sony Super Exview CCD and full Sony Processing Technology. True Day / Night switching is governed by a photocell and employs the latest filter change mechanism for clear daytime colour and enhanced night mono under IR illumination. This model is for use at sites where the optimum viewing distance is up to 25m internally to 30m externally subject to reflective objects. A choice of varifocal lens angles adds to the attraction of this model with dual 12V DC or 24V AC to ensure stable power over short and long distance runs. [\[Product Details...\]](#)

**08 - WTC900X/IR - 600TVL COLOUR X-GEN STARLIGHT OR IR TRUE D/N  
£211.69**

The WTC900X/SHR camera uses the latest Super High Resolution 600TVL Colour / 700TVL Mono True Day / Night X-Gen Module. The Commercial design Cable Managed Housing makes the camera eminently suitable for high value installations. A Super High Optical Grade 2.8~11mm Day / Night Varifocal Lens + the latest LED Technology provides top LED coverage with sharp well defined Mono Images for the whole image view. IR intensity is also adjustable allowing distances from 10m to 50m to be illuminated. Alternatively the DSS setting can be used for Starlight Viewing in Colour. The camera has DNR and Digital WDR circuitry to improve normal and low light viewing plus Privacy Zones and a wealth of adjustments for awkward installations. Alternatively it can be left at factory default with simple lens focussing for standard installations. A test Monitor Output is provided and the camera will operate using either DC12V or AC24V. [\[Product Details...\]](#)

**09 - SK-P500EXV/IR - SUPER HI-RES EXVIEW IR VARIFOCAL TRUE D/N**  
**£245.04**

The SK-P500EXV camera uses a new Commercial design Cable Managed Housing with access for full adjustment of the Camera D/N Switching and IR Intensity Settings. The new Housing also provides a Test Monitor output. A High Quality 2.8~11mm Day / Night Varifocal lens improves the 550 TVL Sony Super Exview Colour Clarity. True Day / Night switching is governed by a photocell and employs the latest Auto filter change mechanism for clear daytime colour and enhanced night mono under IR illumination. This model is for use at sites where the optimum viewing distance is up to 40m. Dual 12V DC or 24V AC is standard to ensure stable power over short and long distance runs. NOTE: A 10X ZOOM LENS VERSION OF THIS CAMERA IS AVAILABLE SEE NEXT CATEGORY OF COLOUR CAMERAS. [\[Product Details...\]](#)

**10 - TRANSPAC TPH8000 - SUPER HIRES COMMERCIAL STYLE IR LED IP66**  
**£253.74**

The TPH8000 is a high quality sturdily built camera using a Commercial Style Cable Managed IP66 Pressure Die Cast External Rated Housing. The Camera incorporates the latest Sony CCD and Chipset offering 540TVL Resolution and True Day / Night Auto Filter change. Dependant on Lens chosen there are either 6 or 7 Super Hi Power IR LED's allowing images up to 80m. Full Heat and Cold protection is used combining both no mist front glass with a internal Fan to dissipate heat. A choice of 2.8~11mm or 9~22mm Day / Night Corrected Varifocal Lens plus a Test Monitor output allow ease of setup and camera use within both Wide Angle and Telephoto areas.
