

## 01 - DVRXL84TX - 4 CH H264 MIDI SILENT DVR, USB, VGA & WEBSERVER

This DVR uses the latest High Resolution H264 Compression for Super Fast Network or Internet Access and Top Quality picture resolution. It has a new advanced Casing and Chassis material eliminating the necessity of a cooling Fan and therefore offering almost silent operation for office and domestic environments.

Facilities include "EZRecord" - which is the fastest standard Record setup facility available. The User simply enters the number of days of recording required and the DVR will set itself to record that period and indicate to the User the Pictures Per Second and Quality being recorded. The User may alter either of these on the display and the DVR will reset to the appropriate number of days. Nothing could be simpler.

A record of Incidents may be saved on a standard USB Flash Memory Stick that simply plugs into the Front Panel. "EZBurn" is the new simple method to Copy recorded incidents to the USB Memory Stick with just 2 Front Buttons to press. In addition the inbuilt Webserver optimises viewing on a Network or off-site via the Internet and this version of H264 Picture Compression increases the speed dramatically.

There is a Main Monitor output and a VGA Monitor output is now included without charge. We also include a IR Remote Control as a standard accessory.

Dome Control is standard and RS485 Keyboards are optional.

This is the ideal Budget, but Top Quality model for sites with 1 ~ 4 cameras.

- Optimised H264 Compression.
- Internal Hard Drive capacity up to 1TB.
- New Advanced Casing and Chassis to eliminate the necessity of a Cooling Fan.
- Main Monitor Output + VGA Output.
